

Contineo Health is a healthcare strategy & technology consulting firm that specializes in EMR implementation, optimization, health data reporting, analytics & interoperability. Our goal is to improve quality of care outcomes and lower costs of care while ensuring that health systems derive the best value from their electronic health data.

We believe in long term partnerships and shared value and work with health systems to position themselves for the emerging models of population health and accountable care. Our product teams are developing mobile patient engagement applications to reduce the burden of chronic disease and building data integration & visualization tools to make existing health data more meaningful and actionable. We aim to enable secure exchange of interoperable health data across national and regional networks while maintaining the security and privacy of health information.

We are an Epic partner and have some of the top technical and functional talent with experience in full life cycle Epic implementation, production support, upgrade, optimization, testing and training. Our Certified Epic consulting teams have a significant cost advantage and base our teams at the client site. We have successfully implemented Epic's Ambulatory, Practice Management, Specialties and Revenue Cycle modules at some of the top academic medical centers.
